

## Planting 70 – Clear Creek Knolls Wetland Corridor – 2006

Site Description: 4 acres along the west side of Clear Creek upstream of the ford at clear creek knolls.

Site History: The 39 aerial photograph shows the site to be clear of trees. The area is currently a heavily wooded floodplain and some upland dominated by large locust, willow, boxelder, cherry, and a few osage orange trees. However a clearing project has begun and these trees will be removed and or treated with herbicide.
